P R E F A C E

 S the modern flat grows more in favor and the demand increases for the more artistic and home-like buildings of this character; and as many of our designs cover this type of buildings, we are devoting this entire issue to flats and duplex houses. A very good idea can be obtained of the general effect of the exterior and of the floor arrangement from engravings herein shown. The plans call for all the latest built-in features, such as fireplaces, buffets, book-cases, writing desks, dressers, breakfast-nooks, coolers, cupboards, wall-beds, etc. The flats are piped for furnace and have cement cellars in most cases.

PLANS AND SPECIFICATIONS

The working plans and specifications of any duplex house or flat shown in this book may be had for the price printed under each design herein. The plans include blue prints of four elevations, foundation plan, first-floor plan, second-floor plan where required, and not less than three sheets of details together with twenty or more pages of closely typewritten specifications. Duplicate sets \$8.00 per set if shipped with order, and if later under separate shipment we charge \$12.00 per set.

PLANS TO ORDER

Should you desire an entirely different plan from any herein listed or as shown in any of our other books, we are fully prepared to draw anything to meet your requirements. We will redraw an entire new floor-plan of flat shown for \$30.00 extra for the first plan, and \$20.00 for the second floor, but not making any change in the exterior, furnishing the stock elevations and details at the price printed. Or we will make special plans of any arrangement or design you wish for a charge of \$11.00 per room for any house not costing over \$10,000.00, counting basement, sleeping porches, and first-story staircase halls or reception hall each as one room, but not counting bath-rooms, porches or small halls.

When we make special plans, we make preliminary pencil sketches of the floor plan and exterior and submit for criticism. After they have been returned, with corrections, if any, we finish them up and furnish three sets of blue prints and specifications complete. A deposit of about \$50.00 is required with order for special plans to cover cost of draughting labor of preliminary pencil sketches.

For special plans of buildings costing over \$10,000.00 we will furnish you prices on submission of a rough sketch and other data you may have describing the character of the building.

BUILDING DEPARTMENT

We have built most of the houses shown in this book and we have a large force of skilled workmen and buy our material at wholesale prices, and are in a position to build your home right, artistic and economically.

HOMES BUILT ON PERCENTAGE

We build anywhere in Los Angeles or surrounding towns for less. Investigate our homes built on the percentage basis, where the owner gets the builders' discounts and his home built for net cost.

 THE Bungalow Court is essentially a Southern California development, but is being rapidly adopted in Eastern cities. It permits of the profitable utilization of deep, double or large, odd-shaped lots, by the erection of a number of small single or duplex bungalows of an inexpensive type in place of a more costly flat building. The gardens, walkways and semi-private character of these courts make them not only popular as homes, but a very profitable investment.

MORE BOOKS ON BUILDING

WE HAVE FOUR OTHER BOOKS, EACH DISPLAYING TYPES OF RESIDENCES NOT SHOWN
IN ANY OTHER ON THE MARKET.

"PLAN-KRAFT"—A Book containing splendid designs of two-story homes ranging in price from \$2500.00 to \$35,000.00.

"KOZY HOMES" is a unique Book illustrating artistic bungalows ranging in price from \$800.00 to \$7500.00.

"HOME-KRAFT-HOMES" portrays many fine residences designed especially for Eastern trade. The prices range from \$1150.00 to \$8500.00.

"THE DRAUGHTSMAN" contains modern designs of Bungalows, ranging in price from \$1100.00 to \$10,000.00.

It stands to reason, that after having studied on and worked out a set of plans for a client, we are more familiar with his ideas than a firm who never saw the plans before. It is also evident we can carry out those ideals more readily and with less expense and annoyance to the owner than those not so familiar with his wishes.

Confinement to Design only causes one to become narrow and impractical in the line of construction itself. Those who confine their efforts to building are liable to neglect their artistic instincts.

We have put forth every effort to avoid either of these conditions and have worked with an end in view to combine the greatest possible art and design consistent with true economy and good construction.

Our designer and draughtsmen and our foremen on the jobs cooperate, thus producing an interest in the job that would otherwise be impossible.

No matter how small your building is it will receive the greatest of interest and attention from the foreman as well as the superintendents sent from the Office. "All our clients are our friends; we solicit investigation."

Yours for better building,

DE LUXE BUILDING CO.

WE have arranged a number of plans in serial numbers with alternate floor plans and photographs, for example: 507-a and 507-b floor plans can be used with the same elevations. This allows a greater scope in selecting any floor plan or exterior. . . .
